Dear Friends:

Thank you for the trust you placed in the Brain Injury Association of America (BIAA) in 2020. With your help and support, we overcame enormous challenges – and we did so with compassion, courage, and a lot of hard work.

The year 2020 started out like most other years. Participation in BIAA’s Academy of Certified Brain Injury Specialists was going gangbusters, we hosted another hugely successful Brain Injury Awareness Day on Capitol Hill, and we handled a steady stream of individual requests for help through BIAA’s National Brain Injury Information Center.

Then COVID-19 hit.

Like the rest of the world, we were learning to quickly respond to a public health crisis. BIAA created a special section of our website devoted to coronavirus information and launched a series of videos from brain injury experts to help our community learn to navigate new waters. We hosted teleconferences so that residential rehabilitation providers could assist one another in acquiring necessary equipment and supplies to keep the people they serve safe. We lobbied Congress to provide desperately needed relief for individuals and families. We provided technical assistance to BIAA’s chartered state affiliates around the country to secure Payroll Protection Program funds from the Small Business Administration.

In addition to BIAA’s special COVID-19 activities, we continued to deliver top-notch programs and services. We published our legislative issue briefs, completed our three-year #ChangeYourMind awareness campaign, hosted our Business Practices College, and published our newsmagazine, THE Challenge! We celebrated falls prevention month and presented awards to a distinguished researcher and a clinician.

Amidst all the challenges of our “new normal”, BIAA celebrated its 40th Anniversary. We awarded the inaugural grants in our new Brain Injury Research Fund and welcomed Robbie Baker as our new Chief Development Officer. We forged new partnerships and took up new public policy issues. Through it all, we gave thanks for the health of our Board of Directors and staff and urged everyone in the brain injury community to be safe.

Susan H. Connors, President/CEO
Brain Injury Association of America
National Brain Injury Information Center

BIAA established the National Brain Injury Information Center (NBIIC) to assist individuals and families who experience the life changing, sometimes devastating, effects of brain injury. Callers who dial 1-800-444-6443 speak to compassionate, knowledgeable specialists who assist in locating rehabilitative, legal, financial and other support services critical to maximizing recovery.

The Association works in collaboration with its chartered state affiliates to offer NBIIC services in all 50 states and the District of Columbia. Nationwide, NBIIC specialists responded to more than 20,000 calls for help in 2020. We talked with people who sustained their injuries from a wide range of causes, ranging from motor vehicle accidents to anoxic injuries and non-traumatic causes.

Top Causes of Injury

- MVA: 39%
- Fall: 18%
- Struck by/Against: 14%
- Aneurysm: 6%
- Anoxic: 6%
- Stroke: 5%
- Tumor: 2%
- Other: 8%
- Assault: 6%
Long-term issues (cognition and caregiver coping strategies) were the most frequent call topics of 2020. This data reinforces BIAA’s recognition of brain injury as a chronic condition, emphasizing the value in making information, resources, and support available throughout the lifespan.

Sample responses from people who contacted us for information and support:

• “I’m so appreciative of these referrals! I’ve already had a good conversation with a doctor and he’s making calls to find out more options! You’re all the best!”
• “Thank you for all the resources. This will also be very helpful to my family. In terms of the support groups, I can’t thank you enough for your time and attention.”
• “Thank you so much. We will delve into this information. I talked with my daughter after speaking with you. She was also very appreciative. Thank you again for the information and your kindness on our phone call. I called because I felt your website was welcoming.”
• “This is absolutely phenomenal! I had no idea this level of support was available... which shows why the work you do is so critical. I look forward to exploring the materials more closely; finding the best ways to ensure my own healing as well as to help others.”
Advocacy

The Brain Injury Association of America (BIAA) joined other brain injury organizations in sponsoring Brain Injury Awareness Day on March 4, 2020. The day featured an awareness fair, a briefing focused on Improving Function After Brain Injury and Greater Life Participation, and a reception to celebrate Brain Injury Awareness Month. The event was hosted by the Congressional Brain Injury Task Force, which is co-chaired by Rep. Bill Pascrell, Jr. (D-N.J.) and Rep. Don Bacon (R-Neb.)

Leaders from BIAA chartered state affiliates, individuals with brain injury, caregivers, and professionals met with their elected officials to advocate for the Association’s 2020 public policy priorities, as described in the Association’s legislative issue briefs:

- Bolster Research for Traumatic Brain Injury
- Increase Access to Care for Individuals with Brain Injury
- Improve Awareness and Understanding of Brain Injury
- Coordinate Federal Programs
- Support Brain Injury Education for First Responders

BIAA President and CEO Susan Connors and Rep. Bill Pascrell, Jr. join forces at Brain Injury Awareness Day.

Advocates Carole Starr and Bethany Bryan of Brain Injury Voices pause for photograph between meetings with legislators.

By mid-March, schools and businesses shifted to virtual operations due to the coronavirus pandemic. Accordingly, BIAA shifted its advocacy efforts.
BIAA advocated for inclusion of individuals with disabilities – especially those with brain injuries – in all six COVID-19 legislative packages Congress enacted: Coronavirus Preparedness and Response Supplemental Appropriations Act; Families First Coronavirus Response Act; Coronavirus Aid, Relief, and Economic Security (CARES) Act; Paycheck Protection Program and Health Care Enhancement Act; Paycheck Protection Program Flexibility Act of 2020; and the Consolidated Appropriations Act of 2021, which was a bipartisan-bicameral omnibus COVID-19 relief deal at the end of 2020.

Also in connection with COVID-19, BIAA joined health and disability groups to file an Office of Civil Rights (OCR) Complaint against St. David’s South Austin Medical Center, asserting violations of the Americans with Disabilities Act, Rehabilitation Act, Affordable Care Act (ACA), and OCR guidance, based on the withholding of life-sustaining care and treatment for Michael Hickson, who became disabled in 2017 due to an anoxic brain injury.

Throughout 2020, BIAA urged Congress to protect consumers from surprise medical bills arising out of certain out-of-network emergency care incidents. BIAA was adamant that any proposed legislation must preserve full access to emergency transport – especially air ambulance services. BIAA’s position was highlighted in a series of opinion editorials and letters to House and Senate leaders on committees of jurisdiction. Ultimately, the No Surprises Act was incorporated into the Consolidated Appropriations Act of 2021, creating new opportunities to advocate to the Centers for Medicare and Medicaid Services (CMS) when the agency begins its rulemaking process in 2021.

In the meantime, through its participation in the Coalition to Preserve Rehabilitation, the Association lobbied CMS on issues as diverse as the critical role of rehabilitation physicians in inpatient rehabilitation facilities, facility admission paperwork burdens, expansion of telehealth options during and after the public health emergency. BIAA also voiced its strong opposition to the pay cut slated for physical, occupational, and speech therapists under the 2021 Physicians Fee Schedule. Advocates were successful in temporarily fighting this cut with a special, one-time $3 billion payment in the Consolidated Appropriations Act of 2021. BIAA also weighed in on proposed regulations impacting the Patient Protection and Affordable Care Act.

BIAA continued its fight against implementation of the Improving Medicare Post-Acute Care Transformation (IMPACT) Act of 2014. This law requires CMS to propose a model for a unified post-acute care payment system in which Medicare would pay a pre-determined amount for care based on the patient’s diagnosis regardless of the facility in which the person is treated. Theoretically, an inpatient rehabilitation facility treating a person who sustained a brain injury would be paid on the same basis as a skilled nursing facility or long-term acute care hospital, even though the scope and intensity of treatment would vastly differ. In 2020, BIAA argued that COVID-19 so dramatically changed facility admissions that any data collected would skew existing analyses, necessitating another delay in the law’s implementation.
Public Awareness

BIAA lead the final year of the #ChangeYourMind awareness campaign. The 2018 to 2020 campaign provided a platform for educating the public about the incidence of brain injury and the needs of people with brain injuries and their families. It was used to perform outreach within the brain injury community and pivoted to a virtual campaign due to stay-at-home orders beginning in March.

In response to the coronavirus pandemic, BIAA created a dedicated COVID-19 Resources section of its website for individuals with brain injury, their families, and the professionals who serve them. The Association also released a special edition of THE Challenge! newsmagazine along with a special video series helping individuals cope. For these efforts and the advocacy wins detailed in the previous section, BIAA received the 2020 Organization Award from the Council on Brain Injury (CoBI).

BIAA’s social media reach continued to increase in 2020. The Association used its platforms to raise awareness of issues affecting individuals with brain injury as a result of the coronavirus pandemic. One such issue was the rise in incidences of domestic violence, a major cause of brain injury, due to stay-at-home orders. BIAA also participated in online awareness campaigns including Stroke Awareness Month and National Concussion Awareness Day.

In 2020, more than 40,000 copies of BIAA’s quarterly magazine, THE Challenge!, were distributed in print and online at www.biausa.org. Issues focused on overcoming adversity, building resilience amidst the pandemic, research, and BIAA’s 40th anniversary.
Education, Research, and Support Services

The 2020 BIAA Brain Injury Business Practice College was held Jan. 22-24 in Palm Harbor, Florida, at the Innisbrook Golf Resort. Presenters included Jandel Allen-Davis, M.D.; Matthew Allswede, M.D.; Armando Cardoso; Susan H. Connors; Dana Daly; Lori Lindman, M.S., OTR/L; Christine MacDonnell, FACRM; Brent Masel, M.D.; Tammi Miller, COTAL, MHS, CBIS, CCM; Sarah Morrison, PT, MBA, MHA; Sue Potts, PT; Michael Reed, MBA; Kris Sallee; Gary Seale, Ph.D.; Amanda Stalford, CTRS; Peter Thomas, J.D.; and Mona Taylor-Gordon. Sessions included an overview of federal legislation and regulations relating to brain injury rehabilitation; an update on CARF accreditation standards and best practices; insights into trends and referrals from rehabilitation hospitals, peer review in catastrophic claim resolution, closed and narrow networks, diversification of outpatient neuro rehabilitation offerings, workers compensation payor and employer perspectives on brain injury rehabilitation, best practices in employee engagement, an interactive case study, and a panel discussion of the state of rehabilitation.

The Academy of Certified Brain Injury Specialists (ACBIS) program has been a cornerstone of the Association’s professional education since 1996. BIAA processed more than 2,100 applications in 2020, expanding the certification to more than 8,000 specialists in the United States and other countries, and issued 236 certificates of completion to paraprofessionals and family members who attended Brain Injury Fundamentals trainings. The Association is grateful to the professionals who volunteer their expertise to maintain and enhance the quality of ACBIS education and the rigor of the certification process through the ACBIS Board of Governors:

Maheen Mausoof Adamson, Ph.D.
Juan Carlos Arango-Lasprilla, Ph.D.
Cindy Barrus, PT, MM, CBIST
Brenda Eagan-Johnson, Ed.D., CBIS
Bud Elkind, M.S., CBIST
Sheldon Herring, Ph.D.
Larry Horn, M.D., MRMA
Angie Jackson, MS-CCC/SLP, M.B.A, CBIST
Stephanie Kolakowsky-Hayner, Ph.D., CBIST
Julia Marton, OT, CBIS
Zenobia Mehta, M.A., CCC-SLP, CCM, CBIST
Jimmy Moody, PT, NCS, CBIS
Corey Morrison, M.B.A.
Mary Pat Murphy, M.S.N., CRRN, CBIST
Drew Nagele, Psy.D., CBIST, CESP
Barbara O’Connell, M.B.A., Dip COT
Cindy Roth Pahr, M.Ed., CBIST
Monique Renae Pappadis, Ph.D.
Paige Salinas, LCSW, CBIS
Eric Spier, M.D.
Christina Stack, M.S., MT-BC
Mary Voegeli, APNP, CRRN
Peter Wright, M.B.A., CBIS
BIAA offered six webinar series in 2020:

**Butch Alterman Memorial Series**  
*Technology Tips and Resources to Support TBI Recovery: Telehealth and More*, Laura Jantos

**Business of Brain Injury Series**  
*Best Practices to Boost Employee Engagement*, Gary Seale, Ph.D.  
*Evaluating your Rehabilitation Program: Using the Mayo-Portland Adaptability Inventory*, James F. Malec, PhD, ABPP-CN, Rp  
*Contracting & Payor Relations*, Ken Diashyn and Corey Morrison, MBA  
*Dignity of Risk Following Brain Injury*, Katherine Meredith, Psy.D and Robert Perna, BSN, Ph.D., ABN, ABPdN

**Carolyn Rocchio Caregiver Series**  
*Using Technology to Stay Organized*, Michelle Ranae Wild  
*Caregiving after Brain Injury*, Allison N. Clark, Ph.D.  
*Managing Emotions After Brain Injury*, Dawn Neumann, Ph.D., FACRM  
*Reading Comprehension Supports for People with Aphasia*, Jessica Brown, Ph.D., CCC-SLP  
*Addiction, Barriers, and Recovery Resources*, John Shinholser  
*Live, Strive, Thrive: A Caregiver’s Mantra*, Donna O’Donnell Figurski

**Mitch Rosenthal Memorial Lecture Series**  
*Symptom Attribution in Service Members with mTBI and PTSD*, Douglas Cooper, Ph.D., ABPP-CN, and Capt. Morgan Hardy, M.D., MPH  
*Functional Outcome Trajectories Following Inpatient Rehabilitation*, Kristen Dams-O’Connor, Ph.D.  
*TBI and Inflammation across the Adult Lifespan*, Lisa Brenner, Ph.D., Keisuke Kawata, Ph.D., Jake Powell, Hilaire J Thompson, Ph.D., RN  
*Neuromodulation in TBI Neurorehabilitation*, Alexandra Aaronson, M.D., Theresa L. Bender Pape, Dr.PH, MA, CCC-SLP/L, Ann Guernon, Ph.D., MS, CCC-SLP, Amy Herrold, Ph.D., Joshua M. Rosenow, M.D.

**David Strauss Memorial Lecture Series**  
*Neurological Music Therapy*, Chrissy Stack, M.S., MT-BC, NMT/F, CBIS  
*Recreation Therapy Following Brain Injury*, Marlene Rivera, CTRS, CBIS  
*Opioids and Traumatic Brain Injury*, Lance Trexler, Ph.D., FACRM  
*Building Resiliency for Clients with Mental Health, Cognitive, and Substance Use Disorders*, Rick Krueger, M.A., LPCC, LADC, CBIS
BIAA continued its collaboration with the Brain Injury Research Center at the Icahn School of Medicine at Mount Sinai to develop and disseminate “Guidelines for the Rehabilitation and Disease Management of Adults with Moderate to Severe Traumatic Brain Injury TBI).” The aim of this research project, funded by BIAA through generous donations, is to identify how much rehabilitation adult patients with moderate to severe TBI should receive, in what setting, and at what point after injury in order to achieve the best results.

Expert panelists are reviewing literature in five areas: behavioral, cognitive, functional, medical, and vocational/participation rehabilitation. Researchers, originally expected to complete the guidelines and recommendations in 2017, have encountered vastly more literature than expected and the end date has been tentatively set for December 2021.

Leaders of the project include Wayne A. Gordon, Ph.D., ABPP/Cn, Marcel Dijkers, Ph.D., Jennifer Bogner, Ph.D., ABPP, FACRM; Keith Cicerone, Ph.D., ABPP-Cn; Kristen Dams-O’Connor, Ph.D.; Steven R. Flanagan, M.D.; Stephanie Kolakowsky-Hayner, Ph.D., CBIST, FACRM; and Angela Yi, Ph.D.

To further support research, BIAA held a grant competition with funding from its Brain Injury Research Fund.

The goal of the grant program is “Finding Cures for Brain Injury,” with research priorities for the 2020 competition in three areas:

1. Chronic Brain Injury (CBI) – What neurological processes are triggered by CBI that cause neurodegenerative diseases and how can the progression from injury to neurological disease be halted?
2. Childhood traumatic brain injury (TBI) – What factors create the risk of adult consequences from childhood TBI and how can that risk be diminished?
3. Excess Mortality – What biological processes are responsible for excess mortality from moderate and severe brain injury and how can these relationships be ameliorated?
In support of these goals and research priorities, the following grants were offered:

1. Dissertation Grants of up to $5,000
2. Young Investigator Seed Grants of up to $25,000
3. Brain Injury Scholar Seed Grants of up to $25,000

The BIAA Research Committee, chaired by Dr. John Corrigan, reviewed numerous Letters of Interest and invited specific applicants to submit a full proposal. From those proposals, the following projects were selected to receive funding:

“The Effects of Early Life Stress on Outcome after Mild Traumatic Brain Injury”
Seed Grant of $25,000
Grantee: Coleen Atkins, Ph.D., University of Miami Miller School of Medicine

“Analyses of the Relationship between Growth Hormone and Sleep after Pediatric Traumatic Brain Injury”
Seed Grant of $25,000 supported by Chaikin, Sherman, Cammarata & Siegel, P.C.
Grantee: J Bryce Ortiz, Ph.D., University of Arizona College of Medicine – Phoenix

“Pediatric TBI Effects on Long-term Myelination: Sex Specificity and Neuroimmune Modulation”
Seed Grant of $25,000
Grantee: Kathryn Lenz, Ph.D., The Ohio State University (Psychology)

“The Role of FK506-binding Protein 51 (FKBP5) in Long-term Psychosocial Outcomes of Pediatric TBI”
Dissertation Grant of $5,000 supported by Dr. Lance and Laura Trexler
Grantee: Dana Lengel, Drexel University

Brain Injury Research Fund Honor Roll
Our thanks to the following Research Champions for their generous support of brain injury research:

Dr. Barry Aron  
Chaikin, Sherman, Cammarata and Siegel, P.C.

Dr. Julieen Crane  

Jennifer and Eric Kirk  
Stephanie Rivard Lane  
Dr. and Mrs. Brent Masel  
Michael’s Mission in memory of Michael Leo Seguin

Dr. Linda Redmann  
John Rivard  
Ira Sherman, Esq.  
Dr. Lance and Laura Trexler  
Angela Caveness Weisskopf
Chartered State Affiliates

The Brain Injury Association of America’s chartered state affiliates provide local and statewide help, hope, and healing to millions of constituents through programs and services, education, prevention and awareness initiatives, and support groups. BIAA held its 25th Annual Affiliate Leadership Conference virtually Oct. 26-28, 2020. BIAA affiliate leaders came together to discuss and focus on innovative strategies to strengthen governance and fundraising acumen.

Association award winners included:

- **2020 Award of Excellence for Collaboration**
  Brain Injury Association of Massachusetts
  Brain Injury Association of Virginia

- **2020 Award of Excellence for Programs & Services**
  Brain Injury Association of Delaware
  Brain Injury Association of New Hampshire
  Brain Injury Association of Louisiana
  Brain Injury Association of Rhode Island

- **2020 Chief Volunteer Officer of the Year**
  Stephanie Ramsey, President, Brain Injury Association of Ohio
Vision

Everyone in the U.S. who sustains a brain injury is diagnosed, treated, and accepted.

Mission

Our mission is to advance awareness, research, treatment, and education that improves the quality of life for all people affected by brain injury.
