The Brain Injury Association of America, Inc. (BIAA) is the country’s oldest and largest nationwide brain injury advocacy organization. BIAA advances awareness, research, treatment, and education and works to improve the quality of life for all people affected by brain injury. We are dedicated to increasing access to quality health care and raising awareness and understanding of brain injury. We are the voice of brain injury.

BIAA-ME (Brain Injury Association of America – Maine Chapter) serves people of all ages who have sustained a traumatic or acquired brain injury from many causes, including but not limited to:

- Aneurysm and arteriovenous malformation (AVM)
- Anoxia
- Brain tumor
- Concussion
- Falls
- Hypoxia
- Hydrocephalus
- Ischemia
- Meningitis, encephalitis, and infections of the brain
- Opioid and other substance overdose
- Poisoning/Neurotoxic injury
- Sports injury
- Stroke
- Surgery

BIAA-ME Services & Support

BIAA-ME provides free personalized information, direction to available services, and support through the Maine Brain Injury Information Center. A toll-free phone call connects persons living with a brain injury, family members or friends, professionals, and the public with an experienced brain injury specialist. Inquiries may also be e-mailed.

**NEURO-RESOURCE FACILITATION (NRF)**

BIAA-ME provides the Maine Acquired Brain Injury NeuroResource Facilitation program, a service supported through a contract with the Maine Department of Health & Human Services, Office of Aging and Disability Services. NeuroResource Facilitation services are personalized to each individual’s situation using a collaborative process that involves participants (individuals living with a brain injury and their personal support systems) working together with BIAA-ME facilitators (individuals who provide assistance in navigating systems) to achieve agreed upon goals. It is more intensive than the information and resources provided through the Maine Brain Injury Information Center. To access the Maine NeuroResource Facilitation services, e-mail NRFMaine@biausa.org or call (800) 444-6443.

**Support Groups**

Brain injury support groups exist throughout Maine and serve to help Mainers living with a brain injury and their families to know that they are not alone. Being part of a strong local support network makes a huge difference in coping after you or a loved one sustains a brain injury.

BIAA-ME provides support group leader training to the 19 support groups that exist currently in Maine and helps link people with these support groups. In addition, BIAA-ME hosts a statewide virtual support group and co-hosts statewide virtual caregiver support groups. For more information, see the Resources and Support section of the website at biausa.org/mainemaine.

**Brain Injury Information and Education**

BIAA-ME provides a wide variety of educational and informative resources for persons affected by brain injury, their families/caregivers, and the professionals who serve them. These resources include an annual conference, webinars, booklets, and brochures. BIAA-ME provides Brain Injury Fundamentals and Certified Brain Injury Specialist training throughout the state, offers educational programs for community service providers, and cross-trains substance use disorder professionals about co-occurring brain injury and brain injury professionals about co-occurring substance use disorders.

**Advocacy**

BIAA-ME fosters statewide advocacy to help the brain injury community work together to advocate for the services, supports, and funding needed by persons living with a brain injury and their families. BIAA-ME coordinates and supports the meetings of the Maine Acquired Brain Injury Advisory Council (ABICM).

**Events to Raise Awareness and Funds for Brain Injury**

BIAA-ME plans community events that offer individuals a way to help raise awareness of brain injury as well as funds to support the services offered through BIAA-ME. Check the event calendar at biausa.org/mainemaine for details. If you are interested in holding an event to raise awareness and funds for brain injury in Maine, please e-mail development@biausa.org.

**About Brain Injury**

Brain injury is a leading cause of death and disability in the United States. People who survive a brain injury face effects lasting from a few days to disabilities that last the rest of their lives. The severity of damage to the brain is a key factor in how much a person will be affected after brain injury. The severity of a brain injury is classified as mild, moderate, or severe based in large part on whether there is a loss of consciousness and how long that lasts.

Brain injury affects who we are and the way we think, act, and feel. It can change everything about us in a matter of seconds. The effects of a brain injury can be unpredictable, complex, and vary greatly from person to person. No two brain injuries are exactly the same. The effects of an injury depend on multiple factors including cause, physical location, and severity. Changes can be temporary or permanent, causing impairment or a complete disability. Each part of the brain serves a specific function and links with other parts of the brain to perform complex functions.

Brain injury can result in physical impairments such as speech, vision, hearing, headaches, paralysis, seizures, fatigue, and more. Cognitive issues like memory deficits, impaired concentration, slowed thinking, limited attention span, and impairments to perception, planning, writing, reading, and judgment are common after brain injury. Individuals may also experience emotional problems, such as mood swings, anxiety, depression, restlessness, lack of motivation, and difficulty controlling emotions.
Regardless of the severity of a brain injury, the early hours, days, and weeks after an injury can be confusing. A “good” day of progress may be followed by a “down” day. Setbacks are common and do not necessarily imply a permanent reversal of gains made. Individuals living with brain injuries may not be fully aware of the impact of their injuries. Recovery is often an unpredictable process involving time, specialized brain injury therapies and services, and family/community support.

After a brain injury, family and friends become an integral part of the long journey of the survivor. Learning a new language filled with medical and rehabilitation terms is often necessary to understand what happened, what services are available, and how services help persons with brain injury recover. Digesting information about the outcome of the brain injury, making the right decisions for accurate treatment for a successful recovery, acquiring benefits, planning for the future, and accepting this new situation can be very stressful for everyone who is involved.

The Maine Brain Injury and Stroke Directory lists resources available to Mainers who have experienced brain injury and their families to assist in navigating through the maze of needed services.

**CONCUSSION**

A concussion is a type of TBI caused by a bump, blow, or jolt to the head or by a hit to the body that causes the head and brain to move rapidly back and forth. This sudden movement can cause the brain to bounce around or twist in the skull, stretching and damaging the brain cells and creating chemical changes in the brain. Concussions are, simply put, an injury to the brain.

A concussion is usually not life-threatening. Even so, the effects of a concussion can be serious. Concussions can occur in any sport or recreational activity, from falls or other activities where a bump, blow, or jolt to the head occurs. Concussions may or may not involve loss of consciousness, can result in memory loss for events immediately before or after trauma, and can result in neurological deficits that may or may not be long-lasting or even permanent.

**STROKE**

A stroke occurs when blood flow to the brain is interrupted and the brain does not get the oxygen it needs, often with devastating consequences. Hemorrhagic strokes are caused by a burst blood vessel in the brain. Ischemic strokes are caused by blood clots that block blood flow to part of the brain.

Some people experience transient ischemic attacks (TIAs) or “mini-strokes” that result from a temporary blood clot. A TIA is often a warning sign that a stroke is likely to occur and should be taken seriously. While a stroke is most common in older adults, children and young adults also experience strokes. The severity of a stroke is often assessed using the National Institutes of Health (NIH) Stroke Scale.

**RISKS AND PROTECTIONS OF PERSONS WITH ACQUIRED BRAIN INJURY**

In 2021, Maine passed a law providing individuals with brain injury rights and access to a grievance/complaint process when things go wrong. Below is a summary of the rights and protections:

1. **Humane Treatment**
   A person with an acquired brain injury is entitled to dignity, privacy, and humane treatment.

2. **Practice of Religion**
   A person with an acquired brain injury is entitled to religious freedom and practice without any restriction or forced infringement on that person’s right to religious preference and practice.

3. **Communications**
   A person with an acquired brain injury is entitled to private communications.

4. **Work**
   A person with an acquired brain injury engaged in work programs that require compliance with state and federal wage and hour laws is entitled to fair compensation for labor in compliance with regulations of the United States Department of Labor.

5. **Vote**
   A person with an acquired brain injury may not be denied the right to vote.

6. **Personal Property**
   A person with an acquired brain injury is entitled to the possession and use of that person’s own clothing, personal effects, and money, except when temporary custody of clothing or personal effects by a provider is necessary to protect the person or others from imminent injury or unless this right has been restricted pursuant to rules adopted pursuant to section 5604 of the Maine Statute.

7. **Nutrition**
   A person with an acquired brain injury is entitled to nutritious food in adequate quantities, and meals may not be withheld for disciplinary reasons.

8. **Medical Care**
   A person with an acquired brain injury is entitled to receive prompt and appropriate medical and dental treatment and care for physical and mental ailments and for the prevention of any illness or disability, and medical treatment must be consistent with the accepted standards of medical practice in the community, unless the religion of the person so prohibits.

9. **Sterilization**
   A person with an acquired brain injury may not be sterilized, except in accordance with chapter 7.

10. **Social Activity**
    A person with an acquired brain injury is entitled to opportunities for behavioral and leisure time activities that include social interaction in the community, as set out in section 5610.

11. **Physical Exercise**
    A person with an acquired brain injury is entitled to opportunities for appropriate physical exercise, including the use of available indoor and outdoor facilities and equipment.

If you believe your rights under this law have been violated and wish to file a grievance or complaint, contact:

MAINE BRAIN INJURY SUPPORT GROUPS

Support groups, even virtual ones, are a great resource for persons living with a brain injury, family members, and caregivers to share with and learn from others who face similar challenges. Each support group is different because it serves to meet the needs of those participating at any given time. Support groups may offer presentations about various aspects of brain injury, opportunities to share experiences and get support and suggestions from others in the group, social or recreational activities, and more.

Please note that contacts, dates, and times frequently change, especially as a result of the Covid-19 pandemic; we recommend you reach out to the group facilitator to confirm details prior to attending a group meeting for the first time. Please check the BIAA-ME website at biausa.com/maine to check for changes. Support group meetings may be held in-person, virtually, or in a hybrid format with both in-person and virtual options available.

VIRTUAL SUPPORT GROUPS

STATEWIDE

Phone: 207-215-7064 (Lee Glynn)
E-mail: WLFGRP@aol.com
When: Every Monday at 10 a.m.

YOUTH SURVIVORS NETWORK

When: Third Wednesday of each month, 12 noon-1 p.m.
E-mail: moriah.hersey@mainehealth.org
When: Third Tuesday of each month, 12 noon-1 p.m.

YOUTH SURVIVORS NETWORK

For brain injury survivors age 16-25 from Maine, New Hampshire & Vermont
E-mail: dcampbell@mpf.org
When: Second Wednesday of the month, 4-5 p.m.

STATEWIDE CONCUSSION

Navigating Concussion Recovery
E-mail: moriah.hersey@mainehealth.org
When: Third Tuesday of each month, 12 noon-1 p.m.

YOUTH SURVIVORS NETWORK

For brain injury survivors age 16-25 from Maine, New Hampshire & Vermont
E-mail: dcampbell@mpf.org
When: Second Wednesday of the month, 4-5 p.m.

APHASIA VIRTUAL MEET UPS

Aphasia Center of Maine
Phone: 207-415-3133 (Annamarie Albiston)
E-mail: info@aphasiancenterofmaine.org
When: Every Monday at 10 a.m.

BREWER – STROKE

Second Thursday of the month, 4-5 p.m.
Phone: 207-973-8278 (Angela Wheelden)
E-mail: awheelden@northernlight.org

PORTLAND – BRAIN ANEURYSM

Last Thursday of the month, 6-7:30 p.m.
Phone: 207-496-2532 (Dave McCausland)
E-mail: dsve@mainebea.org

SCARBOROUGH – BRAIN TUMOR

Second Tuesday of the month, 3-4:30 p.m.
Phone: 207-662-1539 (Sara Cox)
E-mail: scox@mmc.org

PORTLAND – STROKE

First Tuesday of each month, 12 noon-1 p.m.
E-mail: braininjuryvoices@maine.rr.com (Carole Starr)
When: Third Tuesday of each month, 12 noon-1 p.m.

*New members (virtual or in-person) must contact Carole for instructions before attending

IN-PERSON AND HYBRID SUPPORT GROUPS

AUGUSTA

HYBRID

Third Thursday of the month, 3:30-4:30 p.m.
Maine State Library (temporary offices)
242 State St.
Augusta, ME (use door D1)
Phone: 207-215-7064 (Lee Glynn)
E-mail: WLFGRP@aol.com

BREWER

Fourth Tuesday of the month, 4-5 p.m.
Brewer Center for Health and Rehabilitation
74 Parkway S.
Brewer, ME 04412
Phone: 207-999-7300
E-mail: scott@nathalthecare.com (Samantha Scott)

WESTERN MAINE – RUMFORD

First Tuesday of the month, 5-6:30 p.m.
Hope Association
85 Lincoln Ave.
Rumford, ME
Phone: 207-364-4561 (Jessica Hines)

BRAIN INJURY FUNDAMENTALS

Brain Injury Fundamentals is a training and certificate program designed by the Brain Injury Association of America (BIAA) to address the unique needs and challenges of those who care for or encounter individuals living with a brain injury. This includes non-licensed direct care staff, facility staff, family members, friends, first responders, and others in the community. The training course covers essential topics such as:

- Cognition
- Guidelines for interacting and building rapport
The Patient Protection and Affordable Care Act put in place comprehensive health insurance reforms that have improved access, affordability, and quality in health care for Americans. Any individual who is not eligible for Medicare may purchase a health insurance policy through Maine’s federally-facilitated Marketplace.

To find Patient Protection and Affordable Care Act health insurance plan options in Maine, contact:

**Maine Bureau of Insurance**
34 State House Station
Augusta, ME 04333-0034
Phone: 207-624-8475
Toll-free: 800-300-5000
TTY: Maine Relay 711
Website: maine.gov/pfr/insurance

**MEDICARE**

Medicare is a health insurance program available through the Centers for Medicare and Medicaid Services (CMS). While most commonly used by people age 65 or older, younger people with disabilities resulting from brain injury and stroke may be eligible for Medicare. Medicare helps pay for health care costs but does not pay for all expenses or for long-term care.

**SOCIAL SECURITY INCOME**

The Social Security Administration manages two cash benefit programs for people with disabilities. More than 60% of first-time applications for these programs are denied, so be prepared to appeal the denial and consider engaging a disability attorney to advocate on your behalf. There are multiple steps in the appeal process, beginning with a request for reconsideration, moving to a hearing before an administrative law judge (an ALJ), and ultimately, if needed, a hearing in federal court. The success rates for people who have a hearing before an ALJ are nearly 60%, largely because applicants have representation from a disability attorney or a non-attorney disability advocate.

Social Security Disability Insurance (SSDI) provides disability insurance benefits for workers who have contributed to Social Security and become disabled or blind before reaching retirement age.

Supplemental Security Income (SSI) provides monthly cash income to low-income persons with limited work history and resources on the basis of age and disability. Apply online for benefits or contact the local office to apply in person. Social Security offices in Maine can be found below or use the Social Security Office Locator at ssa.gov_locator.

**211 MAINE**

During personal hardships and emergencies, 211 Maine can help you find programs and services that will assist you with basic needs such as transportation, food and clothing banks, shelters, financial and rental assistance, household goods, and utility assistance. 211 Maine operators can also connect individuals to help with domestic violence issues, substance use disorder treatment, education, employment, and more.

Dial 211, text your zip code to 898-211, email info@211maine.org, or visit 211maine.org

**INSURANCE & FINANCIAL ASSISTANCE**

After a brain injury, assistance with paying for the costs of medical, rehabilitation, community and long-term care, and other financial obligations is often needed. Depending on an individual’s unique situation, one or more federal and state options may be available to assist.

The best way to find out if you are eligible for any available program or benefit is to apply as soon after an injury as possible. If you are denied eligibility, be sure you understand why. Sometimes, amending the application or appealing the decision will be successful.

**NEW AVAILABLE BRAIN INJURY FUNDAMENTALS**

**LEARN MORE AT BIAUSA.ORG/FUNDAMENTALS**

- Brain injury and behavior
- Medical complications
- Safe medication management
- Families coping with brain injury

The Brain Injury Fundamentals course is grounded in adult learning principles to maximize participant engagement and application through an interactive workbook. Using real-life scenarios to anchor the course concepts, participants learn about the challenges people face following brain injury and the types of support they need.

MaineCare is a Medicaid Program that pays for medical expenses and related services of people who are not able to pay some or all of their own medical expenses. MaineCare eligibility is based on income, age, and family situations. MaineCare sends payments directly to health care providers rather than the person receiving services. A co-payment (a payment for a portion of the cost of some medical services made by the person receiving services) may be required.

MaineCare has services available to qualifying individuals 18 years and older who have sustained an acquired brain injury. In Maine, a qualifying acquired brain injury is an insult to the brain resulting directly or indirectly from trauma, infection, anoxia, or vascular lesions, and not of a degenerative or congenital nature, but which may produce a diminished or altered state of consciousness resulting in impairment of cognitive abilities and/or physical functioning. It can also result in the disturbance of behavioral or emotional functioning. These impairments may be either temporary or permanent and cause partial or total functional disability or psychosocial maladjustment. This does not include brain injuries that are induced by birth.

Children under age 19 with serious health conditions, such as severe brain injury, may be eligible for MaineCare through the Katie Beckett benefit even when the family income is higher than MaineCare limits.

To apply for MaineCare, contact the Maine DHHS or visit a local office. An eligibility specialist will help determine whether you are eligible for MaineCare and answer questions about the application process and benefits.

MY MAINE CONNECTION
Office for Family Independence (OFI)
Maine Department of Health and Human Services
Toll-free: 855-797-4357

Website: mainecahc.org

Consumers for Affordable Health Care is a nonprofit advocacy organization committed to helping all Maine residents obtain quality, affordable health care. Services include a Consumer Assistance Program that provides free assistance with healthcare questions such as understanding your coverage, coverage disputes, enrolling in MaineCare, or finding other healthcare coverage.

Workers’ compensation is a type of insurance provided by employers for workers who are injured on the job. Benefits include but are not limited to payments for lost time from work due to an injury, payment of medical bills, drug prescriptions and related costs, and vocational rehabilitation. If you are injured at work, you must report the injury to your employer. Maine has five regional Workers’ Compensation Board offices located in Augusta, Bangor, Caribou, Lewiston, and Portland where you can get more information about Maine’s workers’ compensation laws and practices.

GUIDING PRINCIPLES WHEN SELECTING A BRAIN INJURY REHABILITATION PROGRAM

Careful selection of the services that best meet the needs of the persons with brain injury and their families is a critical step toward achieving maximum recovery. An equally vital step is to participate actively in the decision-making about the services being provided and monitoring service delivery whether in the hospital, rehabilitation facility, community residence, or other setting.

Active and ongoing participation means you will be better prepared to make solid, informed decisions and to maximize available resources.

Be Curious and Ask Questions
While you know your loved one best, you are likely not familiar with the wide range of programs, services, resources, and information in the brain injury rehabilitation field. Learn as much as you can about any program that might be appropriate for your loved one by asking questions about its staff, service philosophy, history, and method of collecting outcome data. If you do not understand something, ask someone at the program...
to explain it in the detail you need. Like medicine, brain injury services are often as much an “art” as a “science” and can vary widely from program to program.

Learn From Others
When researching multiple programs and services, try to talk with individuals who have participated in each one. Support groups are often a good way to find people who have had experience with a program you are considering. Ask the facility or organization to provide references of individuals who have used their services. Sometimes, due to privacy concerns for those receiving services, you may not always be able to get references. In many states, consumers can access information about the quality and performance of programs and facilities that are licensed or accredited. Ask prospective facilities how to obtain outcome data and quality information about their program.

You can also check out the program or service provider online, keeping in mind that those who have had negative experiences are most likely to complain, and their experiences may not be fully representative of the quality of a given provider.

Explore More Than One Program
Whenever possible, thoroughly consider several options. The closest program or the one that offers the most services may not necessarily be the best for your loved one’s individual needs. Be wary of anyone who tries to pressure you while paying attention to any time constraints that may result from limited availability or financial, and for your loved one’s outcome. Take the single most important decision you make emotionally, by deciding how you wish to use your and your loved one’s time, energy, and resources. Voice your opinions, questions, and concerns promptly and respectfully.

Choosing brain injury programs and services may be the simplest most important decision you make emotionally, financially, and for your loved one’s outcome. Take the time to make good decisions. Once services begin, stay on top of what is being provided and what other options exist. Be an informed consumer.

Be Involved, Stay Involved
The ultimate goal is to help your loved one succeed. Brain injury programs and services should promote self-determination and community integration to the fullest extent possible. Self-determination can be achieved by deciding how you wish to use your and your loved one’s time, energy, and resources. Voice your opinions, questions, and concerns promptly and respectfully.

Get a written disclosure statement from the provider before services begin. The statement should document what services will be rendered and exactly who will be responsible for payment, co-pays, and deductibles. Get regular updates about where you stand financially with the payer and the service provider(s).

Get It in Writing
Keep a log of who you spoke to, the date, time, and a summary of your conversation. There will be a lot of information, including new and technical terms to process, so it is easy to forget details. You may wish to record your conversations so you can refer to them later. Be sure to ask permission in advance; most professionals will readily agree to be recorded. Get any commitments in writing of the types, quantities, and costs of services be provided before you finalize your decision.

Know Your Financial Situation
Find out about public or private benefits your loved one may be eligible for and apply promptly. Depending on what kind of services are needed, talk with your insurance carrier and ask about deductibles and co-payments. Get a copy of your insurance policy or health plan and re-read it. Find out the extent of your financial obligations. Ask about the long-term implications of decisions you make today.

Before services begin, be prepared to fight denials by your insurance company. “No” does not always mean “no.” BIAA has published a free guide called “Navigating the Insurance Maze” that can be downloaded at biausa.org/insurance. Be prepared for ongoing negotiations with insurance representatives and contact the BIAA affiliate in your state to be referred to advocates who can help.

Appendix A provides a list of questions that may be helpful as you consider different program and service options.

BRAIN INJURY MEDICAL, REHABILITATION & COMMUNITY PROGRAMS
Brain injury program providers in Maine offer a diverse range of medical and rehabilitation services on an inpatient, outpatient, transitional residential, and community basis for adults and children. Some of the providers below are also service providers for the State of Maine Medicaid Waiver and other programs so you will find them listed more than once in this directory.

CERTIFIED STROKE CENTERS

COMPREHENSIVE STROKE CENTER

Comprehensive Stroke Center certification from the Joint Commission recognizes hospitals that meet standards to treat the most complex stroke cases. Standards include all components of a Primary Stroke Center plus:

• Availability of advanced imaging techniques
• Availability of personnel trained in vascular neurology, neurosurgery, and endovascular procedures
• 24/7 availability of personnel, imaging, operating room, and endovascular facilities
• Neuroscience intensive care facilities and capabilities
• Experience and expertise treating patients with large ischemic strokes, intracerebral hemorrhage, and subarachnoid hemorrhage

Maine Medical Center
Phone: 207-662-0111

PRIMARY STROKE CENTERS

Primary Stroke Center Certification recognizes hospitals that meet standards to support better outcomes for stroke care. Standards include:

• A dedicated stroke-focused program
• Staffing by qualified medical professionals trained in stroke care
• Individualized care to meet stroke patients’ needs
• Patient involvement in their hospital care
• Coordination of post-discharge patient self-care
• Streamlined flow of patient information while protecting patient rights, security and privacy
• Collection of the hospital’s stroke-treatment performance data
• Hospital team performance data
• Use of data to assess and continually improve quality of care for stroke patients

ATTORNEYS AND LEGAL ASSISTANCE

In the aftermath of a brain injury, the injured person and his or her family often need to seek the advice of an attorney. Medical treatment, such as brain injury rehabilitation, and long-term care services are expensive and may span many years. Individuals and families must address and make decisions on financial issues, estate planning, returning to work or school, establishing guardianship or a power of attorney, and other issues.

BIAA provides an interactive directory of Preferred Attorneys with experience handling brain injury cases. The directory is available on BIAA’s website, and users may search for a local preferred attorney specializing in one of three practice areas: personal injury, civil rights, and financial issues. Visit biausa.org/preferredattorneys or call the BIAA-ME Brain Injury Information Center Toll-free at 800-444-6443 to find a lawyer who understands brain injury and is qualified to assist you and your loved one.

Excerpted and adapted from Moderate to Severe Brain Injury: A Practical Guide for Families, ©2018 Brain Injury Association of America, Inc.

Appendix B is a guide to help with selecting legal representation in the event that is helpful or necessary in your situation.

Clients pay a $10 administrative fee. In some cases, clients may be asked to pay court and other significant costs. The Clinic does not otherwise charge for its services.

Our law firm has successfully represented hundreds of Mainers suffering from concussions and traumatic brain injuries.
Individuals who have sustained a brain injury sometimes find that their driving skills are no longer the same. Family, friends, and caregivers may worry about whether a person living with a brain injury can drive safely. Because we take our driving skills for granted, it is easy to forget that driving is the most dangerous thing we do in our everyday lives. We might consider in your personal situation.

**Driving Evaluation and Consultants**

Individuals who have sustained a brain injury sometimes find that their driving skills are no longer the same. Family, friends, and caregivers may worry about whether a person living with a brain injury can drive safely. Because we take our driving skills for granted, it is easy to forget that driving is the most dangerous thing we do in our everyday lives. We might even think of it as the ultimate multitasking experience.

**Brain Injury can affect the many physical, cognitive, and behavioral skills needed to drive well, depending on the individual and the type of injury. Some states require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom they require physicians to report to the authorized state licensing agency if they have a patient for whom
driving may no longer be safe. Other states require licensed drivers to report any change in medical status before they resume driving.

A driving evaluation is a crucial step in determining a person’s ability to drive following recovery from a brain injury. An individual may be referred for an evaluation and/or training through an inpatient rehabilitation program, a state-supported program, a private vocational counselor, or the Department of Veterans Affairs. In some cases, the program or organization making the referral can also cover the cost of the evaluation and any training that follows. Health insurance does not usually cover the cost of a driving evaluation.

**NEUROLOGISTS**
A neuropsychologist is a psychologist with specialized training in relationships between the brain and behavior. Neuropsychological testing is often recommended after a brain injury to identify strengths and weaknesses in a person’s thinking skills. It involves tests that provide a baseline measure of a person’s abilities. The testing also suggests ways to improve strengths while working around areas of weakness.

SPEECH AND LANGUAGE PATHOLOGY  
Speech-Language Pathologists (SLPs) provide evaluation and treatment for communication, fluency, voice, and swallowing disorders. Following a brain injury, a person may exhibit changes in cognitive-communication skills including memory, attention, problem-solving, organization, word retrieval, and other thinking skills. Other changes that a person may exhibit include difficulty articulating words, dysfluency (stuttering), and changes in voice or swallowing. Both inpatient and outpatient rehabilitation programs typically have speech-language pathologists on staff. Additional programs and private practices are listed here.

THE VOICE OF AWARENESS, ADVOCACY AND PROGRESS

Maine Brain Injury and Stroke Resource Directory  
www.biausa.com/maine
Through its online MaineLink pre-screening application, the Maine Department of Health and Human Services provides services to the people of Maine. It is a division of the Maine Office of Aging and Disability Services (OADS), which is the primary Maine state agency that provides independent oversight and advice to meet your needs when meeting with an eligibility specialist at a local office or calling for information.

Maine State Brain Injury Services
For individuals living with brain injuries and their families, Maine offers the following specific programs to those meeting functional and financial eligibility criteria. Please note that, except for the Outpatient Neurorehabilitation Services, you must first be eligible for MaineCare to access the following State of Maine services:

- Brain Injury Waiver (Home and Community Based Services for Adults with Brain Injury)
- Other Related Conditions Waiver (Home and Community Based Services for Adults with Other Related Conditions)
- Outpatient Neurorehabilitation Services
- Nursing Facility Acquired Brain Injury Services

Maine State Brain Injury Waiver: Home and Community Based Services for Adults with Brain Injury (Section 18)

Office of Aging and Disability Services
Maine Department of Health and Human Services
Phone: 207-287-9200

MaineCare offers a package of benefits to eligible people aged 21 and older, with cerebral palsy, epilepsy, or any condition other than mental illness, that requires treatment similar to persons with intellectual disabilities, is likely to continue indefinitely, and results in substantial functional limitation in three or more major life activities (e.g., self-care, learning, understanding and use of language, or mobility). Commonly called the "Other Related Conditions Waiver," it provides community-based services instead of placement in an institutional setting.

The program is designed to maximize the opportunity for eligible MaineCare members to achieve the greatest degree of self-sufficiency and independence with service provider(s) chosen by the individual. Conflict-free care coordination, services provided in the least restrictive modality and effective use of assistive technology for communication, environmental control, and safety are key aspects of this Medicaid waiver program.

Community services available include home support, physical, occupational and/or speech therapy, community and work supports, assistive technology, and more. In order to be eligible for the benefits in this package, an individual must meet the criteria to receive services in an Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF-IID). After an application is received, an assessment will be conducted to determine eligibility. If the person is determined to be eligible for this waiver program, the individual will be placed on a wait list. Once a person is awarded a funded offer and is able to start services under the Other Related Conditions Waiver, a person-centered plan will be developed with OADS staff.

Additional Maine Medicaid waiver programs
In addition to the Maine Brain Injury Waiver Program, the State of Maine offers a number of other Medicaid waiver programs for individuals eligible for MaineCare (e.g., Home and Community Benefits for the Elderly and Adults with Disabilities, Residents of Nursing Facility, and Residents of Residential Treatment Facilities).

Be sure to ask about the eligibility requirements and benefit packages for these so you can choose the one that is best suited to meet your needs.

Outpatient Neurorehabilitation Services (Section 102 Clinics)

Eight outpatient neurorehabilitation treatment clinics are available throughout the state of Maine and through MaineCare to offer physical, occupational, and speech therapies and other services to help individuals living with a brain injury recover their physical, communicative, and cognitive abilities through a person-directed or person-centered plan of care.

To be considered for this state of Maine service, eligibility for MaineCare and a diagnosis of brain injury.
are required. The clinic will assist in setting up an outpatient neurorehabilitation program. Individuals who are not eligible for MaineCare may also receive services from the programs listed below.

**Medicaid**

Programs such as pharmaceutical companies’ patient assistance programs, low-cost generic programs, Medicare Part D, and state and local prescription programs can help save on medication costs.

**Prescription Drug Discount Programs**

**Maine Low-Cost Drug Program for the Elderly and Disabled and Maine Rx Plus**

Maine Department of Health and Human Services

Toll-free: 866-796-2463

TTY/TDD: 207-287-1828

The state of Maine offers two prescription drug assistance programs for its residents. Both programs provide financial assistance to participants; however, they differ on the amount of assistance and eligibility requirements. There is no cost to enroll in either of these programs. Apply online at My Maine Connection or visit a local Maine Department of Health and Human Services office.

**Maine Low-Cost Drug Program for the Elderly and Disabled (DEL)**

Offers greatly reduced prescription drug and some over-the-counter drug costs for individuals aged 62 and older and to individuals aged 19 and older who meet eligibility requirements based on disability and income/asset limits.

**Maine Rx Plus**

Offers prescription drugs at a discount and is available to all Maine residents based on income/asset eligibility requirements only.

**MedAccess Prescription Assistance Program**

Phone: 207-662-7968

Toll-free: 877-275-1787

Website: mainehealth.org/Patients-Visitors/Billing-Insurance/Financial-Assistance/MedAccess

Funded by MaineHealth and offered through local hospitals, the MedAccess program helps patients and healthcare providers find low-cost prescription drug options. Programs such as pharmaceutical companies’ patient assistance programs, low-cost generic programs, Medicare Part D, and state and local prescription programs can help save on medication costs.

**Centers for Independent Living**

Centers for Independent Living (CILs) provide services to maximize the independence of individuals with disabilities and the accessibility of the communities in which they live. Core CIL services include: advocacy, independent living skills training, information and referral, and peer counseling. Many CILs also help people find housing and personal care assistance. Maine has three CILs operated by Alpha One in Bangor, South Portland, and Presque Isle.

**Alpha One**
127 Main St.
South Portland, ME 04106
Phone: 207-787-2189
Website: alphaonenow.org

**Independent & Community Living**

**Independent Living Services Program**
Bureau of Rehabilitation Services
Maine Department of Labor
Website: maine.gov/rehab/dvr/independent_living.shtml

The Maine Independent Living Services program assists people who have significant disabilities to live more independently in their homes and communities. Services may include but are not limited to: independent living skills training, home and vehicle modification, augmentative communication devices, mobility training, and counseling. Funding for this program comes from the federal government and is limited, so you may find that there is a waiting list for these services. Be sure to apply as soon as possible if you require this service. The program is provided under a contract from the State of Maine to Alpha One, with locations in Bangor, South Portland, and Presque Isle.
Disability Rights Maine (DRM) is Maine’s designated Protection & Advocacy agency for people with disabilities. DRM represents people whose rights have been violated or who have been discriminated against based on their disability. DRM also provides training on rights and self-advocacy and advocates for public policy reform.

How can DRM assist me?

DRM can provide self-advocacy assistance and individual representation directly to individuals with disabilities whose legal issue is related to their disability. Some areas where DRM might be able to assist individuals with brain injury include:

- Requesting reasonable accommodations in housing, employment, and other areas
- Challenging service denials and helping clients access needed services
- Facilitating communication with government agencies and service providers
- Helping clients access self-directed care where appropriate
- Advocating for termination of guardianships and/or acquisition of the AT that can make everyday life easier after a brain injury. Many offer loaner devices, device demonstrations, and device reuse.

Adapt-Able Living

Telephone Equipment Loan Program (TEP)
Provides ‘No’ or ‘Low’ cost adaptive telecommunication equipment to any Maine resident who cannot use home’s conventional telephone due to physical or cognitive disability.
The Maine Relay Service is a free service available 24 hours a day, 365 days a year that provides a communications link between those who use a standard voice telephone and those who use specialized telephone equipment or assistance because they are deaf, hard of hearing, or have a speech or physical disability that prevents use of a standard telephone.

Specialized telecommunications equipment may be a Text Telephone (TTY), a telebraille telephone for someone who is deaf-blind, or other type of equipment to address a specific communication disability. There is no extra charge for the relay service. All calls are confidential and no record is kept of calls.

When a call is placed through the Maine Relay Service, a Communication Assistant (CA) provides the needed communication link between the two parties.

COMMUNITY ACTION AGENCIES

Community Action Agencies are non-profit organizations that provide services to people with low incomes in Maine to help them escape poverty and achieve economic security. Through programs such as Head Start, job training, housing, food banks, energy assistance, and financial education, CAAs tailor their services to meet the needs of the individuals and communities they serve.

Websites: mcicap.org
Provides a list of all CAA agencies across Maine and the services provided by each CAA program.

MaineHousing – Subsidized Housing
Maine State Housing Authority
26 Edison Dr.
Augusta, ME 04330
Phone: 207-626-4600
Toll-free: 800-452-4668
Website: mainehousing.org/programs-services/rental/subsidized-housing

MaineHousing is an independent state agency that bridges public and private housing finance, combining them to benefit Maine’s low and moderate-income people. Financing from MaineHousing and other government sources has resulted in affordable apartments having been developed across Maine. In most cases, the rents for these apartments are preset. In some cases, the tenant pays a portion of their income towards rent. Eligibility requirements and income limits vary by property.

RENTAL HOUSING
Mainehousingsearch.org
Toll-free: 877-428-8844
Website: mainehousingsearch.org

Mainehousingsearch.org is Maine’s free rental listing service. It’s fast and easy to use and includes detailed listings with pictures, maps, and more. Listings are updated daily.

SECTION 811 SUPPORTIVE HOUSING FOR PERSONS WITH DISABILITIES

The Section 811 Supportive Housing for Persons with Disabilities program is a Department of Housing and Urban Development (HUD) supportive housing program that assists the lowest income people with significant and long-term disabilities to live independently in the community by providing affordable housing linked with voluntary services and supports.

The Section 811 Project Rental Assistance (PRA) is a HUD-funded program providing rental assistance to eligible, extremely low-income, disabled individuals between the ages of 18 and 62. The program is a partnership between MaineHousing and the Department. Applicants for 811 PRA Housing must also be eligible for home-based services provided through OADS.

Applicants must be extremely low-income, 30% of AMI or below, and the household must include at least one individual with a disability who is aged 18-62. Applicants must also be eligible for community-based, long-term care services as provided through the five MaineCare waivers: Sections 18, 19, 20, 21, and 29.
MaineHousing has assistance for approximately sixty 811 PRA units in four regions: Bangor, Augusta, Lewiston/Auburn, and Portland. However, MaineHousing will also expand the geographical selection to include parts of Aroostook County. Information can be found at MaineHousing’s website: mainehousing.org/services/rental/rentaldetail/section-811-pra.

LIBRARY SERVICES

Library for the Blind and Physically Handicapped

The use of legal or illegal drugs increases the risk of an acquired brain injury and can negatively affect recovery from an Acquired Brain Injury. Substance use disorder (SUD) is a disease that affects a person’s brain and behavior and leads to an inability to control the use of a legal or illegal drug or medication. It results when addiction causes changes in the brain’s wiring, causing people to have intense cravings for the drug, making it hard to stop using the drug, despite life-threatening consequences.

Individuals with traumatic brain injury are at an increased risk for SUD as they have exposure to multiple risk factors:

• High rates of chronic pain
• Higher risk for pre- and post-substance abuse
• Injury-related behavioral changes
• Overprescribing of opioids
• Treatment barriers

Due to these risk factors, individuals with traumatic brain injury are 11 times more likely to die of accidental poisoning or overdose. Professionals recognize that there is an increased risk for addiction or relapse post brain injury. Cognitive issues, depression, and decreased socialization can make these individuals more vulnerable.

Excerpted from TBI and Opioid Overdose: An Unrecognized Relationship presented by Lance Tweler, Ph.D., FACRM, a BIAA Webinar, October 13, 2020.
NON-LETHAL OPIOID OVERDOSE AND ACQUIRED BRAIN INJURY

It has been suggested that the opioid crisis is a nationwide public health emergency; an epidemic that is the deadliest drug crisis in American history. Opioids are the leading cause of death for Americans under 50 years of age. In 2021 Maine had 627 fatal overdoses, and a total of 9,534 reported overdoses. Source: Maine Drug Data Hub 2022.

Non-lethal overdose can result in permanent brain damage. Opioids (or opiates) are depressants, slowing down a person’s breathing and heart rate; in other words, an overdose causes the body to forget to breathe on its own. When that happens, an individual can sustain either a hypoxic brain injury (not enough oxygen) or an anoxic (no oxygen) brain injury. These types of brain injuries can cause a multitude of side effects, including loss of short term memory, difficulty concentrating, vision and/or hearing loss, loss of coordination and balance, issues with sequencing, problems with communication, and behavioral changes. The longer the brain is deprived of the oxygen it needs, the higher the risk for more permanent brain damage.

Excerpted from the Brain Injury Association of Virginia: Opioids and Brain Injury, 2018.

TREATMENT STRATEGIES

A number of treatment models for addressing substance use/misuse have been proposed. Best practices for treatment of substance use/misuse within the brain injury population include:

- Abstinence
- Patient and family education
- Incentives to encourage participation and retention in programs
- Modification of Alcoholics Anonymous (AA) and Narcotics Anonymous (NA) to make it more concrete and understandable
- Use of motivational interviewing techniques
- Interventions that support adaptive coping
- Use of community resources to maximize social interaction and minimize boredom

Excerpted from the Brain Injury Association of Virginia: Opioids and Brain Injury, 2018.

FEDERAL, STATE & TRIBAL AGENCIES

FEDERAL

Substance Abuse and Mental Health Services Administration
Helpline: 800-662-4357
TTY: 800-487-4889
Text your zip code to 4357 48 (HELP4U)
Website: samhsa.gov
Website: findtreatment.samhsa.gov

The Substance Abuse and Mental Health Services Administration’s (SAMSHA) national helpline is a free, confidential 24/7/365 day-a-year treatment referral and information service (in English and Spanish) for individuals and families facing mental and/or substance use disorders. This service provides referrals to local treatment facilities, support groups, and community-based organizations.

STATE

Office of Behavioral Health
41 Anthony Ave.
Augusta, ME 04333
Phone: 207-287-2595
TTY: Maine Relay 711
Website: maine.gov/dhhs/samhs

The Maine Office of Behavioral Health’s (OBH) role is to support Maine residents with mental health, substance abuse, and co-occurring disorders in living not only symptom free, but with dignity, hope, and meaning. The Office partners with providers, communities, and individuals to offer support, resources, education, training, technical assistance, and services.

211 Maine Substance Abuse

PEER SUPPORT

Augusta Recovery and Re-Entry Center (ARRC)
2 Bangor St., Suite 2
Augusta, ME 04330
Phone: 207-226-3438
Email: info@thearrc.org
Website: thearrc.org

Maine Alcoholics Anonymous
Hotline: 800-737-6237
TTY: Maine Relay 711
Website: csoaamaine.org

The Maine Alcoholics Anonymous (MNA) is a 501(c)(3) nonprofit organization. MNA is a member of the National Council on Alcoholism and Drug Dependence (NCADD) and the Maine and New Hampshire Alcoholics Anonymous (AA) State Services. MNA is a self-help recovery organization which promotes the Twelve Step program of Alcoholics Anonymous by creating and sustaining recovery community centers across Maine to encourage and provide support for recovery from alcohol and other drug addiction. MNA’s mission is to serve the needs of those affected by alcoholism and addiction by providing a confidential, anonymous, and affordable source of recovery, education, and support services.
INTEGRATED MEDICATION-ASSISTED TREATMENT (IMAT)

Individuals with substance use disorders may benefit from integrated medication-assisted treatment which combines talk therapy (either individual or group counseling) with medicines that can control cravings and lessen withdrawal symptoms. The medicines help a person feel normal again so they can focus on therapy and help rebuild their life. This therapy can continue as long as medically needed. The medicines that are used are:

- Buprenorphine (pronounced byoo-pre-nor-fine), also called suboxone
- Methadone (available only at a methadone clinic)
- Naltrexone (nal-trek-sohn)

The IMAT program helps patients get the care they need, close to home. Patients who need intensive services can get care by providers with special addiction training. More stable patients can get their IMAT treatment at primary care offices by doctors and behavioral health clinicians. If a patient’s condition worsens, they can switch back to intensive care for more help until they become healthier and ready to return to receiving care at a primary care office.

TRANSPORTATION

Transportation services continue to be impacted by the Covid-19 Pandemic. Regular schedules and routes may be limited. For the safety of all passengers, you may be required to wear a face mask while in vehicles. Be sure to schedule rides at least two days prior to your appointment.

TRANSPORTATION BROKERS

MaineCare works with transportation brokers to schedule rides for non-emergency medical appointments. There are three transportation brokers for the State of Maine: ModivCare, Midcoast Connector, and Penquis. To schedule a MaineCare covered ride, you must call the transportation broker that coordinates rides for your county. Call at least two full business days before your medical appointment.

ModivCare
ModivCare has five different reservation numbers for scheduling rides; however, you can call any of the numbers and get the help you need. For the purposes of this Directory, one reservation line and one Ride Assist number are listed:

Reservation Line: 855-608-5179 (to schedule a ride)
Ride Assist: 855-608-5179 (for questions about a ride that has already been scheduled)
Website: modivcare.com

Knox, Lincoln, Sagadahoc, Waldo Counties and the Towns of Brunswick and Harpswell

Midcoast Connector
Toll-free: 855-930-7900 (option 1)
Website: waldocap.org

VA MAINE HEALTHCARE SYSTEM
In addition to Togus VA Medical Center, 11 Community Clinics are found throughout the state of Maine. These provide the most common outpatient services, including health and wellness visits, without the challenges of visiting a larger medical center. A list of locations will be found at: maine.va.gov/locations.

SCREENING FOR TRAUMATIC BRAIN INJURY (TBI)
It is essential that service members and veterans are screened for TBI as early as possible because TBI becomes more difficult to treat the longer the condition goes unscreened and the complexity of diagnosing TBI and post-traumatic stress disorder (PTSD) become more challenging to distinguish.

Brain Injury Association of America - Maine Chapter
126 Western Avenue, #261
Augusta, ME 04330

**APPENDIX A**

**SELECTING AND MONITORING BRAIN INJURY SERVICES**

**Questions To Make Informed Decisions and Monitor Brain Injury Services**
The questions below may not apply to all programs or service providers in all settings. BIAA encourages you to select those questions that make sense for your particular situation. There may be other questions you feel are important as well, so add them. Write down the responses you get. Ask the same questions of each program or service provider you are considering, and then compare the responses. If you need more information or something is not clear, do not hesitate to ask.

Please do not be concerned about the amount of time it may take you to ask the questions you have selected. Selecting a program or service that meets your needs is important. Monitoring services once they have begun is also important. Refer to this guide from time to time and reflect on how well the program staff or service provider is doing what they said they would. Ask questions you did not consider during the selection process but which become important as things progress. Remember, information is power.

**IN-PATIENT MEDICAL AND REHABILITATION PROGRAMS**

**Discharge Planning**
Planning for discharge must begin at admission. It is imperative to have an understanding of what the next step is after discharge, as well as what kinds of services might be needed and their availability. Be clear about your intent to be involved in discharge decisions. As with other information, it is important to get discharge planning commitments in writing. It is virtually impossible for anyone to tell you the particular level of recovery that will be achieved. They can, however, commit to what they will do to achieve maximum recovery.

- What are all the possible options after discharge?
- What is the length of stay you expect for me/my loved one? How is that determined?
- How do I get a complete set of records for my files upon discharge? Is there a charge for this? How much does this cost and who pays?
- Where are people with brain injury the program served in the past?
- What happens if the place the person is expected to go after discharge falls through?
- What happens if it appears the person has no viable discharge option?
- What is the role of the person with brain injury and their family in decisions about discharge?
- Where do you think the person will go after discharge?
- How and who decides when the individual is ready for discharge? What would make the program extend or shorten the anticipated discharge date? If this is done, how much notice is given, and is the role of the individual and their family in this decision?
- What if a person decides to leave the program with or without advance notice?
- How does the program help research discharge options? Who does this?
- How is the length of stay you expect for me/my loved one? How is that determined?
Financial Responsibilities / Arrangements
People with brain injuries have had to leave programs or service providers before they are ready because their funding has been exhausted. Large unexpected bills for brain injury services have surprised many people and dramatically changed their financial stability and status. The best way to prevent these occurrences is to stay informed about your continuing financial status both with the program or service provider and with any funding source(s) you have available.

What does the program do to locate affordable community housing with a package of supports provided by a variety of state and community agencies to afford the individual the opportunity to live independently (i.e., transportation, recreation, vocational, educational and/or personal assistance)? How does the program assist in identifying and coordinating with community service providers?

QUESTIONS APPLICABLE TO ANY PROGRAM/SERVICE PROVIDER

Financial Responsibilities / Arrangements
People with brain injuries have had to leave programs or service providers before they are ready because their funding has been exhausted. Large unexpected bills for brain injury services have surprised many people and dramatically changed their financial stability and status. The best way to prevent these occurrences is to stay informed about your continuing financial status both with the program or service provider and with any funding source(s) you have available.

Who is billed for services my funding source will not pay for? What happens if the second source does not pay?

Am I (or is my insurance) billed for services that are planned or scheduled but not provided (e.g., if a therapy session or appointment is missed)?

How do home visits or other leaves of absence affect payment? Is there a bed hold charge? If so, who is expected to pay if insurance will not?

What assistance does the program offer to determine which other public or private insurance and financial benefits the individual may be eligible for? How will they help you apply and follow the application process for these?

Admission Planning

What are the rights and responsibilities of people participating in this program? How does the program or service provider inform the individual of these? May I have a copy?

How do you make decisions about who to admit into the program or service? What are the eligibility criteria?

How will you get previous medical and other important (i.e., school) records and other information you may need in order to make this decision?

I would like a proposed service or treatment plan before I decide. How can I get this?

How do you involve the program or service I am in now in the admission and transition process? Be specific.

If I choose this program or service, what do you need to do prior to admission? How long will that take? What do you need me to do?

How can I arrange to spend some time observing the program? Note that depending upon the nature of the facility, program or service, this may not be possible given the patient confidentiality provisions of HIPAA, the Health Insurance Portability and Accountability Act of 1996.

What is your understanding of the role my funding source has in the decision-making process about the program or service I select?

What forms or contracts will I be expected to sign prior to admission or starting the service?

How will you get previous medical and other criteria?

How will you get previous medical and other criteria?

How will you make decisions about who to admit into the program or service? What are the eligibility criteria?

Assuming you have appropriate HIPAA releases where needed, how does your program or service involve family members and friends?

How are family members and friends involved in progress meetings? How will we be informed enough in advance so we can plan to participate? Will there be a specific contact person for regular communication with me?

What do I need to do to get copies of written reports regularly? Who is responsible for sending me these?

How will you schedule regular conference calls for me to speak with the direct service providers if I cannot personally attend an in-person meeting?

If I have a question about a particular area (e.g., physical therapy), what do I need to do to speak with that therapist directly?

What kind of family training, support groups and/or therapy is offered? Is there a charge for participation?

Since I live far away, what overnight arrangements are made for me to visit for a few days? How about for the person’s friends?

What arrangements are made for staff to explain services and reports to me in non-technical terms?

What is your policy about visitors?

What are your policies which would affect friends when the person being served makes with other people served by your program? What arrangements are made for them to spend time together as they might choose?

What arrangements are made if we wish to have conjugal visits?
Legal Considerations

- How does a legal settlement affect the program’s expectations about payment?
- Has the program ever recommended guardianship, conservatorship, or representative payees for people being served? Has the program ever recommended that these are no longer needed? If yes, what assistance is provided to the individual, family members, or friends who choose to pursue the recommendation?
- Is the program licensed, accredited, or certified? By whom? How can I contact them to learn more about what they require for licensing? Can I see the license?
- When was the last state or local inspection and what were the results?
- Is the program CARF brain injury accredited? Any other CARF accreditation? When was the last survey?
- Is the program accredited by the Joint Commission? At what level (1 year, 3 year, type 1)? When was the last survey?
- What recourse does the person being served have if they question or disagree with the quality or necessity of services being provided?
- What recourse do family members and friends have if they question or disagree with the quality or necessity of services received?
- What provisions are made for personal banking services? Where do you keep money that belongs to people being served in your program? How do you account for money which is put into your program’s care and who is responsible for this accounting?

Observations about aesthetics

- Are the facilities clean?
- Are people being served clean and dressed in a manner you are comfortable with? Do they appear to be well cared for?
- Does the staff seem attentive? Do they know people by name? Do they seem to care genuinely about people in the program?
- When food is part of the program/service, is the food appealing? How does the program accommodate special diets, personal preferences, or requests for a different meal schedule? Is there any charge for this?
- Do people being served seem comfortable with the way they are being treated?

Experience with people with brain injuries

- How many people with brain injuries has the program worked with in the past year? How many total individuals have they served?
- What is the average staff turnover rate? Do they recruit people who have experience in serving people with brain injury? What staff training is provided? How many ACBIS Certified Brain Injury Specialists (CBISs) are on staff?
- How long has the program been in existence? When did it begin to serve people with brain injury? Why was it established?

Program administration and organization

- Who is responsible for the overall supervision of the services rendered to people served? How often are they at the program? How much direct contact do they have with individual people served?
- What types of people will be working directly as part of the team?
- How does the program integrate the individuals expressed desires and goals in service planning? For example, if an individual dislikes cooking and will not be expected to cook at home, is cooking an expected program component? If it will take a person three hours to feed himself/herself and he/she determines it is a waste of energy preferred to use another way, how will the program support this decision, and what assistance will be provided to find ways to have feeding done by someone else – both at the program and at home?
- Is there a consistent schedule for an individual’s day? What involvement does the person have in directing the schedule and selecting the program components?
- What do people generally do during unscheduled times?
- What is the evening schedule?
- What is the weekend schedule?

Medical services/medications

- Who is responsible for providing medical services? How is my personal physician included in providing medical services while I am in the program?
- How does the program handle medical emergencies?
- How are routine medical issues (e.g., regular dental and ophthalmology services) handled?
- How would the program manage the special medical needs which have resulted from the injury? I have heard that people can have trouble with bedsores. How does this program avoid or prevent this?
- What is the policy for the use of psychotropic or other mood-altering medications? What role does the individual have in these decisions? What does the program do if they decline against medical advice? Does the program utilize the services of a neuropsychiatrist?
- Who monitors medications and medication interactions? How often is this reviewed? What steps are taken to assure that therapeutic levels of medications are maintained and not exceeded?

Program Components

Cognitive services

- What approaches does the program use to address cognitive strengths and limitations?
- Is neuropsychological testing done? How much emphasis is placed in test reports on recommendations to build on an individual’s cognitive strengths? How much emphasis is placed on reporting test scores and the person’s limitations? When is retesting conducted?
Behavioral interventions

- What approaches does the program use to address behavioral concerns? What role do the individual and their family play in determining the types of behavioral interventions used?
- What steps does the program take to assure that behavioral interventions are clearly understood by all staff and that the plan is being implemented consistently (even in the middle of the night)?
- How is the effectiveness of behavioral interventions measured?
- What role does medication play in “behavior management”? Are physical restraints used? If so, under what circumstances? What policies or protocols exist for the use of physical restraints? May I see a copy of these?
- Is a “secure” or locked unit available? When does the program recommend the use of these? Who decides when a person is ready for an open unit after being on a secure unit? How?
- At what point is an individual’s behavior deemed unacceptable to the program? How much notice does the program give the individual and their family? What efforts are made by the program to assist in locating a comparable program that can better meet the needs of the person?

Vocational services

- What is the extent of vocational services provided by the program?
- How are situational vocational evaluations conducted? How are job trials, training, or placement provided? How are job coaches used? For how long?
- What interface is there between the program and state vocational rehabilitation services?

Educational services

- What educational services are offered? To children? To college students? To adults?
- Does the program have a teacher on staff with expertise in educating children and adolescents with brain injury?
- What is the interface between the program and the person’s school?

Community Re-entry

- What components of the program take place in the community? How frequently is the individual in the community?
- How is the person’s ability to get around and to use community services and resources evaluated and addressed?
- What local resources are used by the program to address the needs of the individual?
- How does the program accommodate an individual’s request to participate in community activities (e.g., AA or league bowling)?
- What outreach does the program do to help educate the community about brain injury and its consequences?
- What does the program do to learn about the individual’s home community and to identify resources and contacts there? What linkages are made with these resources and contacts prior to discharge? Are any of these contacts part of any discharge planning? Is there any follow-up once discharge has occurred?
- What efforts are made to work with the person in their home, even if the program is “facility-based”? How often can this be expected – once for evaluation only or multiple times to prepare the person for the return home?

Community Re-entry

- What is the interface between the program and the local Independent Living Center?

Recreation

- How does the program accommodate the individual’s continued involvement in recreational interests and activities? Are modifications of activities or equipment suggested, and opportunity for situational exploration of the effectiveness of modifications included?
- What does the program do to support the individual’s desires to become active in new recreational pursuits?
- How does the program help the individual identify ways to participate in recreation and social opportunities within their community?
- What connection does the program have with: the local recreation department, community therapeutic recreation services, social support and activity groups or other community resources?
Choose Your Attorney Carefully

Choosing an attorney can have significant long-term implications. The attorney will seek to obtain full compensation for medical bills, lost income, and future care costs. The attorney may also seek damages for pain and suffering. Importantly, an experienced attorney can help to preserve any entitlements to federal and state benefits. Without careful planning, valuable benefits may be lost.

Choosing an attorney requires consideration of many factors, including education and training, knowledge of the consequences and treatment of brain injury, knowledge of how to structure and manage awards, and experience with similar cases. An attorney must have the financial resources to try the case as well as access to the best experts.

Attorneys Also Choose Their Cases Carefully

Most personal injury attorneys work under a contingent fee arrangement. This means the attorney receives no fee if the plaintiff is not compensated. Attorneys will often invest substantial time and money during the investigation, preparation, and resolution of the case. Because of the financial risk involved, attorneys may decline cases if they do not believe there is a reasonable likelihood of success.

Getting Started

Most brain injury attorneys offer a free consultation. If you take your case, there is no attorney’s fee if there is no compensation.

Once you have an appointment with an attorney, be prepared to answer the attorney’s questions about the injury. You may also find it useful to have a written list of questions to ask the attorney.

During the consultation, you will want to ask about the attorney’s legal background and experience with cases involving brain injury.

Be observant during the time you spend with your attorney. Pay attention to how the attorney and his or her office staff interact with you and your family, and determine if it is comfortable for you. Trust your instincts. Many personal injury cases take years to resolve, so the relationship between you and the attorney can be very important.

Here are some questions you may want to ask:

- How much of your practice is devoted to personal injury?
- Of your personal injury cases, how many are devoted to brain injury?
- How did you first become involved in brain injury cases?
- Based on the information you have, what are the strengths and weaknesses of my case?
- What additional information about my case do you need?
- Who else in your practice would you involve in my case? What role(s) would these people have? Describe their background and expertise.
- Who will be my primary contact with your practice?
- Are you or your law firm able and willing to advance as much as $50,000 in the investigation, preparation, and presentation of my case?
- Have you been successful handling cases similar to mine in the past?
- What is your involvement with legal associations, local, state, or national brain injury associations, or other organizations?
